

# Taxiway edge flag

## PRODUCT DESCRIPTION

The taxiway edge flag is used instead of taxiway markers at airports without artificial surface. An indication for such a change occurs when, in the case of an aerodrome with an unpaved runway, at least one taxiway is designated, for which markers are placed not more than 3 m from the edge of this road, at a uniform distance of not more than 80 m apart on straight sections of an unpaved taxiway and not more than 50 m apart on taxiway curves.

The taxiway edge flag is rectangular and blue. The flags shall be placed at a height of up to 0,7 m above the ground level. The flag has dimensions of 0,5 m x 0,3 m. The flags shall be placed not more than 3 m from the edge of the taxiway, at the same distance not more than 50 m apart, and on the taxiway curves not more than 20 m apart.

## PRODUCT APPLICATION

◆ Airports

◆ Landing areas

## TECHNICAL DETAILS

Producer:	APS AVIATION
Warranty:	12 months
Color:	Blue/edge reflective tape
Material:	200 g/m <sup>2</sup> polyester, waterproof fabric

Montage:	A wooden stick driven into the ground
Dimensions:	30 x 50 cm
